

All measurements are approximates only
Double check everything
Body Depth 1.5"
Control route 13/16"
Wiring channel 1/2"
toggle cavith 1"

Bridges position should be calculated from actual fretboard and final nut position
the Bridge position shown is only a guide for approx position
The neck and fretboard have been drawn based on the Stew mac Gibson Boards 24.562"
Neck angle is drawn at 2.5 degrees this is only an Approximation, again you will need
to calculate the correct angle based on which style of neck body transition you use
There is an online calculator you can use by Tundra man

Tuner spacing needs to be matched
to selected tuners for the project
Positions are Approx only
